EDUCATION

Associate of Science in Computer Science for Transfer

Aug 2022 - Jan 2024

Hartnell College | Salinas, CA

- Degree concentration in Software Engineering with a foundation in computing fundamentals and theoretical concepts

Bachelor of Science, Computer Science

Aug 2022 - May 2025

CSUMB | Salinas, CA

- Degree concentration in Software Engineering, curating designs, developing, and deploying software for a variety of systems and platforms

Relevant Coursework

- Undergraduate Coursework: Multimedia Design & Programming, Operating Systems, Software Engineering, Database Systems, Software Design

Languages: C, C++, Python, Java, JavaScript, TypeScript, Swift

Technologies: Git, GitHub, Node, SQL, React, HTML, Android Studio

Skills: Full-Stack Web Development, API Design & Integration, Agile Development, CI/CD (GitHub Actions), Version Control, Cross-Functional Collaboration,

Projects/Experience

AI-Powered Itinerary Planner – Backend Developer [Link](#)

Feb-May 2025

Collaborated with a cross-functional Agile team to design and implement a personalized travel itinerary web app. Built and maintained scalable API endpoints and an SQLite database to serve custom data based on user preferences. Wrote unit tests for data reliability, participated in sprint planning and standups, and integrated backend logic with React-based frontend.

Technologies: JavaScript, Node.js, SQLite, React, Git

Wishlist App – Backend Developer [Link](#)

Nov-Dec 2024

Built backend infrastructure for a full-stack e-commerce web application within a 4-person Agile team.

Implemented secure authentication using OAuth, designed and queried SQL databases, and contributed to API integration. Participated in code reviews and closely coordinated with frontend developers to ensure a seamless user experience.

Technologies: SQL, OAuth, Node.js, Python, Git

Portfolio Website – Frontend Developer [Link](#)

June-July 2025

Designed and developed a responsive personal portfolio using React to showcase software projects and GitHub activity. Focused on component-based design, reusable styling, and accessibility. Employed version control, mobile-first CSS, and deployment planning.

Technologies: React, JavaScript, HTML, CSS, Git

Additional Qualifications

CSin3 program

Aug 2022 - May 2025

Accepted into a competitive accelerated program, enabling completion of a Bachelor's in Computer Science in 3 years. The program emphasizes both theoretical knowledge and practical coding skills.
